

STREAMLINE YOUR DIGITAL INFRASTRUCTURE

Device Management

Seize the potential of your digital workplace

Is your portfolio of devices such as laptops, smartphones, tablets and IoT devices well-connected? Are your users, software and hardware playing by the same rules? And are you in control of how you get the most out of your productivity solutions?

One scenario that we often meet is that in spite of having invested in the Microsoft 365 suite, few features and tools are utilized by the organization. This especially true for the management of endpoints and devices for employees.

Your advantages of Device Management

Take advantage of Sentias experts and tap into the professional management of devices no matter location and seize the full potential of your modern workplace. We help you define and implement an endpoint management strategy that paves the way for the secure and compliant configuration, maintenance, monitoring, remote management and troubleshooting.

IMPROVED MANAGEMENT

Get your workplace in control with the professional management of all devices including both organizational and employee owned.

STRENGTHENED COMPLIANCE

Frame-in your organization with the management of rights, policies and rules that ensures your compliance with rigorous regulation.

SIMPLIFIED USER EXPERIENCE

Reduce your complexity and streamline the access to data for your employees with a standardized experience no matter device or location.

ENHANCED SECURITY

Protect your confidential data across devices with new capabilities of controlling data and enforcing guidelines.

Device Management

6 steps to your streamlined digital workplace

1

Consultation

Your license and device landscape can be complex, so we start out with a dialogue about your license needs and consult you about the optimal configuration.

2

Alignment

The recommended service is checked for any deviations from your request and is aligned to e.g. adjusted scope of the solution.

3

Selection

The recommended and aligned standard service and plan is selected and for delivery as a proof of concept no matter your organizational size or complexity.

4

Implementation

The agreed solution is configured and set in operation. The project is managed by an allocated consultant og project manager depending on the model.

5

Adjustment

Taking into account experiences from the POC project, we agree upon needed or necessary service adjustments from standard.

6

Follow-up

Our service is kept up to date and aligned with future changes and development to the technology. As your configuration might need updates, together, we will walk you through and configure any major changes.

Getting started

Take advantage of Sentias expertise to secure the professional practice for your device management. Contact us to learn how we can help you secure an overview of your portfolio and recommend you the right plan aligned with your business implemented and after best practices.
