

Secure Branch Office

All-in-One Managed Single or Multi-site Networking

Providing a cohesive and secure network infrastructure across your locations is no easy task. Complex and distributed environments are left vulnerable to advanced cyber threats and combined with lack of networking specialists all of your resources are used up on dealing with day-to-day troubleshooting.

With our experts managing the entire network stack you can ensure uniform, scalable infrastructure across all sites. We deliver a comprehensive and fully integrated service including next-gen firewalls, LAN networking, and WiFi tailored to your needs and managed end-to-end.

Empower Your Distributed Business

Onboard to high-performance connectivity to the cloud or hybrid environments providing 99.9% availability across sites and supporting up to 10,000 users per location. Let Sentia manage your unified architecture built on advanced security features and achieve operational efficiencies as well as 30% faster network deployment compared to in-house setups.

SCALABLE AND FLEXIBLE

Take advantage of a rightsized network solution that scale seamlessly as you grow no matter the number or magnitude of sites. Expand with peace of mind and match your unique performance and user needs with optimized and scalable network solutions that allow for effortless upgrading and adding of infrastructure components.

INTEGRATED RELIABILITY

Designed for high availability and compatibility, your services are interoperable and centrally managed reducing network complexities. Take advantage of integrated and secure network operations, optimized for reliability across your distributed locations.

UNMATCHED NETWORK SECURITY

Leverage next-gen firewalling for secure and seamless connectivity across your locations and hybrid cloud resources. Advanced security features such as port security and access control combined with network segmentation plus Zero Trust and Single-Sign On-ready architecture safeguards your users and data.

FULLY MANAGED

Sentia takes care of your entire network stack across sites so you can focus on your business priorities. We handle everything from design and deployment to configuration and ongoing management of your network security, LAN and WiFi services. Enjoy simplified and end-to-end management, faster rollouts, and guaranteed security and uptime across all your sites and locations.

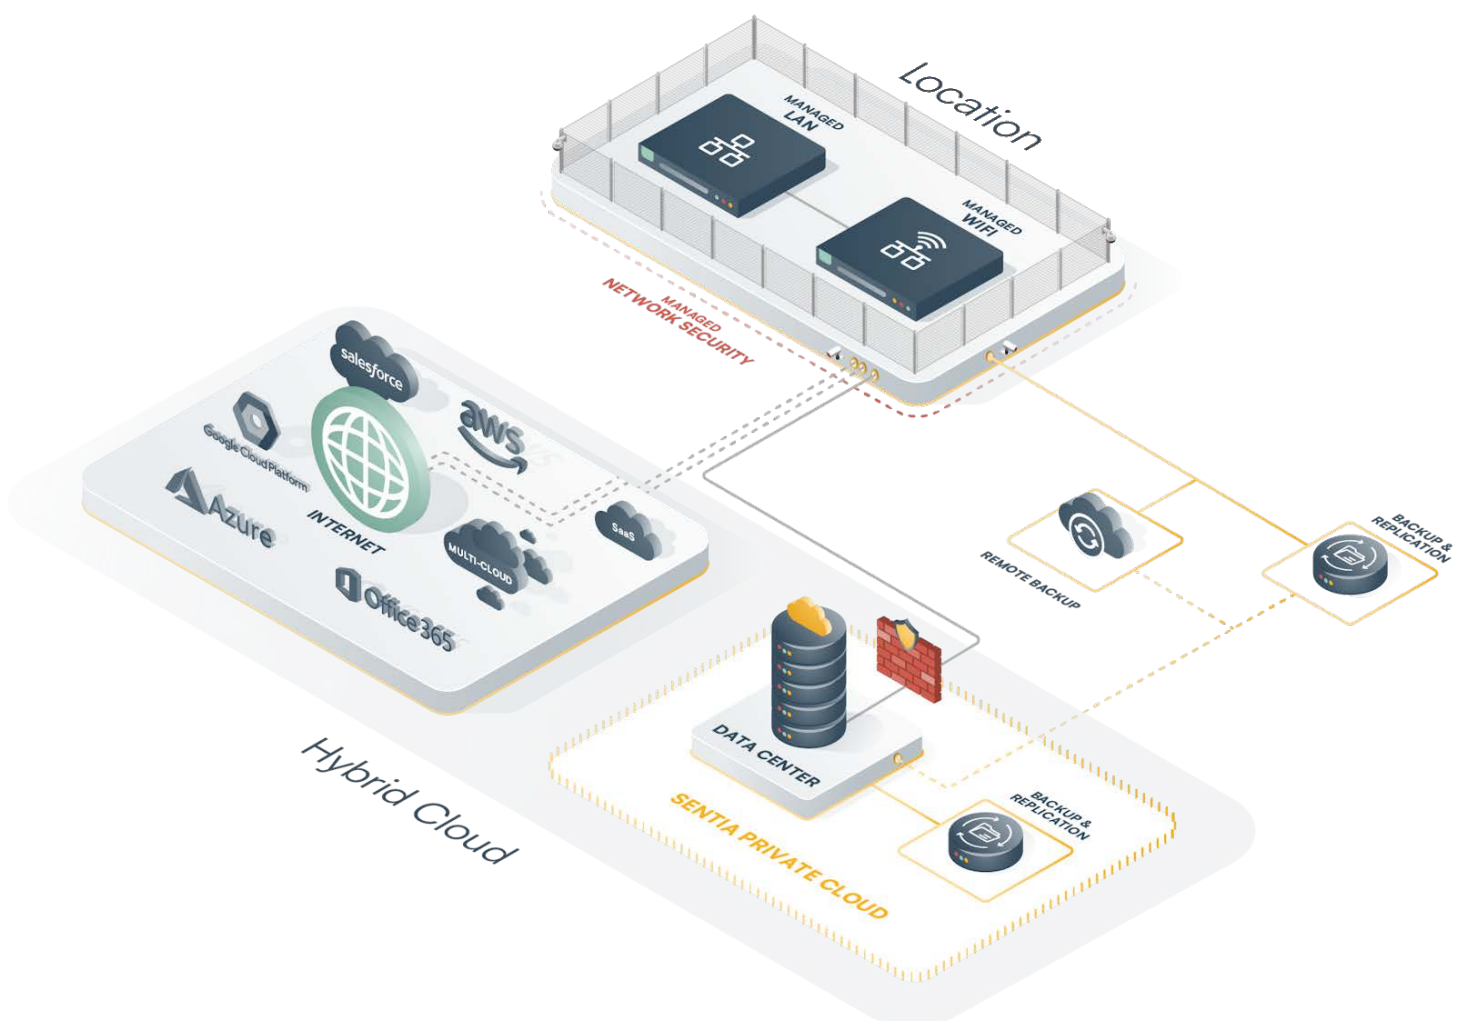

STREAMLINE YOUR DIGITAL INFRASTRUCTURE

Secure Branch Office

Connect Your Business to and from Anywhere

It's time to unify your network infrastructure and provide reliable connectivity between office sites, central infrastructure, and mission-critical hybrid cloud environments. From growing and mid-sized branches to major sites - Site Network Management ensures simplified network management along with peak performance no matter your amount of devices or users and across any location.

Bringing together datacenter and site in one solution, we can connect your location seamlessly to Sentias high-tier datacenters. The integration of your sites with our local datacenters enables enterprise grade encryption, high security and future proof SDWAN technology while significantly reducing your overall network complexity.

Secure Branch Office

Onboard to Your Integrated Network Foundation

Managed Network

Take advantage of a professional LAN infrastructure solution and proactive management to avoid the risk of outdated setups or unmanaged hardware.

- ✓ End-to-end network management
- ✓ Site-to-Datacenter integration
- ✓ High speed network performance
- ✓ Integrated network security
- ✓ Scalable across sites and locations
- ✓ High availability with automatic failover
- ✓ Reduce in-house workloads
- ✓ Improve operational stability
- ✓ Support and ServiceDesk as your single point of contact
- ✓ All in one service covering sites and datacenter

Managed WiFi

Experience hassle-free and robust wireless networks, expertly designed to streamline and align performance and cybersecurity and grow with your business.

- ✓ High-speed wireless connectivity
- ✓ Latest technology available
- ✓ Scalable WiFi to match your organization
- ✓ Monitoring of user experience and tuning
- ✓ Comprehensive and high-precision coverage
- ✓ Meet distributed network requirements
- ✓ Aligned network performance
- ✓ Fully managed service
- ✓ Built-in customizable captive portal

Managed Network Security

Safeguard your connection to mission-critical resources, detecting and blocking sophisticated attacks and providing a genuinely safe online work environment for employees - anywhere.

- ✓ Unified threat and vulnerability management
- ✓ Advanced threat protection and zero trust access
- ✓ Encrypted connectivity and nextgen L7 firewalling
- ✓ Full network security management
- ✓ Real-time traffic analysis, bandwidth monitoring and proactive response
- ✓ Secure network architecture
- ✓ Improved network security posture
- ✓ Integrated network security

Getting started

Take advantage of Sentias expertise to secure a fully managed site network architecture. Contact us to learn how we can help you secure integrated networking across locations. We will provide you with a complete mapping and recommend you the right plan aligned with your business and implemented and after best practices.
