

Welcome to the leading zone

Land your applications safely in the cloud, and hit the ground running

Sentia Landing Zone is a cloud adoption framework that allows organisations to run a large-scale migration to or operations in the cloud, in a continuously compliant, secure and efficient way.

Talk to us about how we can make your cloud operations secure & compliant | sales.dk@sentia.com

SIMPLIFY DEVELOPMENT EFFORTS

A high degree of standardisation means engineers can easily understand environments built by others, avoiding issues with scaling.

ACCELERATE SERVICE DELIVERY

Pre-defined layers and profiles containing efficient templates ensure deployment in seconds, instead of days.

PERFORM WITH GREATER FLEXIBILITY

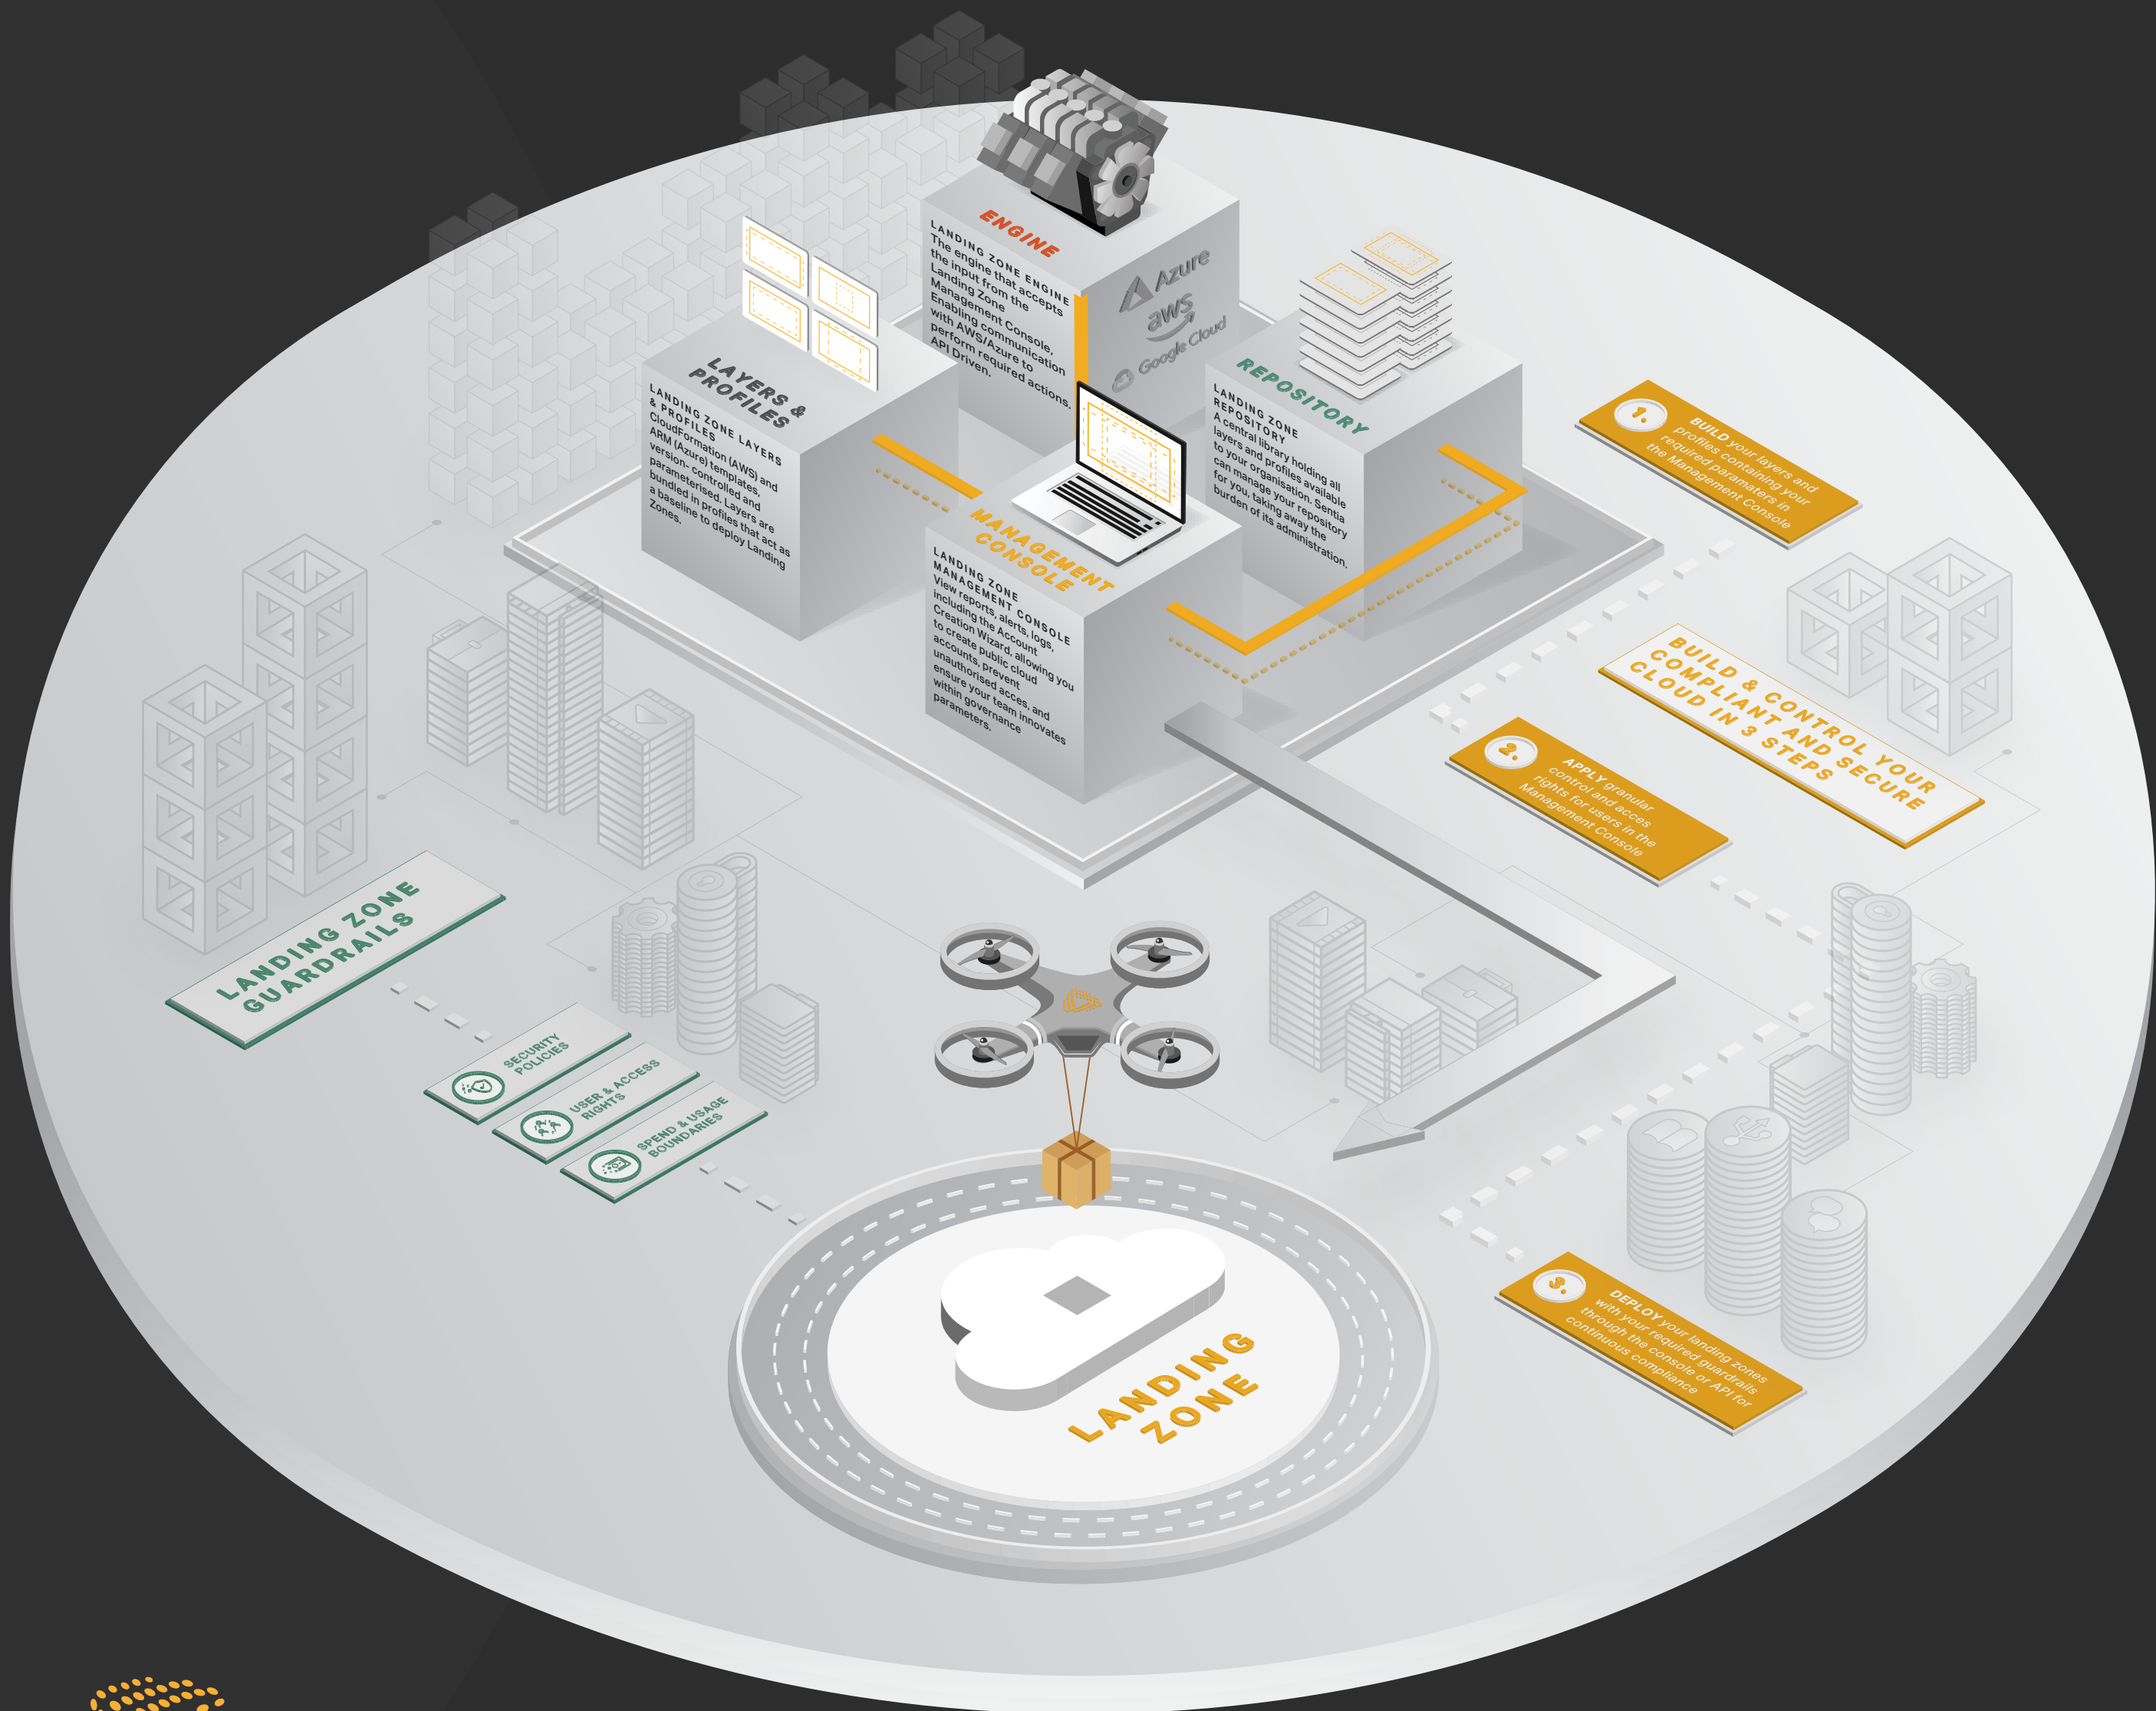

The Leading Zone is 100% API driven, making it easy to replace components or extend functionality of applications

BUILD PROFILES EASILY

With Leading Zone profiles, Sentia defines and creates new profiles in a flexible manner accounting for each business unit as and when they need new ones.
